ABSTRACT

Test items for the introduction to psychology and leadership course (see the final reports which summarize the course development project, EM 010 418, EM 010 419, and EM 010 484) which were compiled as part of the project documentation and which are coordinated with the test-workbook on achieving effective communication (EM 010 426, EM 010 427, EM 010 428, and EM 010 504) are provided in this document. Progress check items with answer sheets, research pretest items, and unused items are included for criterion referenced test items, and cumulative posttest items with content references comprise research norm referenced items. EM 010 420 through EM 010 447 and EM 010 451 through EM 010 512 are related documents. (SH)

INTRODUCTION

The test items included in this book have been prepared for use in the course, An Introduction to Psychology and Leadership. They have been compiled as part of the project documentation. Additionally, some instructors may find them of use in preparing their own quizzes and tests. The Table of Contents on the next page indicates the classification of the test items within segments. The Progress Check answers are identified by a title page. The research pretest items are identified by the word PRE in the upper right hand corner of the page. The unused items on which there are no data are identified by their enclosure in the rectangular box. The research norm referenced test items are identified by the acronym CPT in the top right corner of each page.

For those unfamiliar with the differences between criterion referenced items and norm referenced items, the following is briefly offered. Criterion referenced items test learning of specific objectives. Students are expected to perform quite well on these items if they have adequately used the instructional materials. Their relationship to the terminal and enabling objectives are referenced for each. A norm referenced item should display more discrimination power, i.e., they are expected to reflect the distinctions between students who have depth of knowledge as opposed to those who have a superficial knowledge. Since they do more than merely test objectives, they should be used cautiously since it would not be unusual or unfavorable for a large percentage of students to choose incorrectly in answering this type of item.

TABLE OF CONTENTS (BY SEGMENTS)

A. CRITERION REFERENCED ITEMS

1. Progress Check Items

With answer sheets and
objective reference matrix.

2. Research Pretest Items

With objective reference.

3. Unused Items

With objective reference.

B. RESEARCH NORM REFERENCED ITEMS

1. Cumulative Post Test Items

With content references.

IMPORTANCE OF INTERPERSONAL COMMUNICATION

PROGRESS CHECK

Question 1.

Which of the following is an example of interpersonal communication?

- a. The ship's yeoman types a memo and delivers it to the Training Officer..
 - b. The Training Officer posts a list of the third class petty officers who passed the recent test for promotion to second class.
 - c. The Officer of the Deck reads the Captain's night order book before assuming the watch.
 - d. The Executive Officer holds a meeting of department heads to discuss the quarterly training plan.
-

Question 2.

Select from the following the definition of general communication.

- a. A process which enables one to achieve effective communication with one's subordinates.
- b. A process which enables one to establish a foundation fundamental to leadership because it produces effective communication.
- c. A process whereby information is sent to one or more persons in order to achieve a common understanding about some situation, object or event.
- d. None of the above

Question 3.

Select from the following the correct definition of feedback.

- a. Feedback separates interpersonal communications from general communications
 - b. Feedback allows the sender to modify a communication.
 - c. Feedback, in interpersonal communication, helps make better decisions.
 - d. Feedback, in interpersonal communications, is that process by which a sender of a message receives some information of the effect of his message on the receiver.
-

Question 4.

Select from the following the correct definition of a zero interaction situation.

- a. A communication situation where the sender receives no feedback
- b. A communication situation where the accuracy of communication is low
- c. A communication situation where the sender's confidence is low
- d. A communication situation where less time is required to prepare and send a message

Question 5.

Select from the following, the paragraph which best describes the possible conclusion derived from observation of effects of zero interaction conditions.

- a. A sender is separated from the receiver while describing a situation to him. No interchange of communications is allowed.
- b. Accuracy of communication is impaired because there is opportunity for feedback which is important in developing good communications.
- c. Accuracy of communication is low and both the sender's and receiver's confidence in the accuracy of his work is low. Although the receiver tends to become frustrated, relatively less time is required to complete the communication.
- d. None of the above

Question 6.

ENS Nozzle has the duty in port on board a destroyer and conducts instruction for the fire and rescue party. He uses the time allocated to explain the use of the handybilly, oxygen breathing apparatus, fire extinguishers and all other equipment which will be used by the fire and rescue party. He allows no time for demonstrations or questions from the members of the party, which includes men who are attending their first instruction period.

Which of the following best describes this situation?

- a. ENS Nozzle knows his business, however, some members in the party lack confidence that they can do their assigned tasks.
- b. ENS Nozzle knows he gave a concise explanation of the use of equipment and knows the fire and rescue party can meet any emergency.
- c. ENS Nozzle and his men are not confident that all members of the fire and rescue party will perform their assigned tasks because neither questions nor demonstrations on the use of equipment were permitted.
- d. None of the above

Question 7.

Which of the following describes the most probable outcome of a free feedback interaction condition?

- a. Before leaving his ship for two days Captain Porter leaves written instructions for the ship's office yeoman to prepare an extensive report. Captain Porter wants the report typed while he is gone so that he can sign it upon his return to the ship. The report is prepared incorrectly, because the yeoman did not fully understand the Captain's written instructions.
- b. The Captain conducts his personnel inspection of the R Division on a cruiser. He smiles and congratulates the Division Officer when he notices the men's sharp appearance. Consequently the seamen are fairly confident that they have pleased the Captain.
- c. The instructor of the class for disbursing clerks has to monitor a test in the next classroom. He directs his class to make the last three sets of page changes in their manuals. The instructions are on the first page in the manual. After the class finishes making the changes, they may leave. Only a third of the class members makes the page changes.
- d. None of the above

Question 8.

What would you probably conclude from observing the effects of a free feedback interaction condition?

- a. Because the listener is allowed to ask questions, interrupt and make comments, etc., free interaction assists communications proportionate to the amount of feedback allowed.
 - b. The accuracy of communication improves and the sender's and listener's confidence in the accuracy of communication improves in direct proportion to the amount of feedback allowed.
 - c. Frustration, due to inability to get clarification, increases and the time needed to complete a communication increases in direct proportion to the amount of feedback allowed.
 - d. Both a and b above
-

Question 9.

Select from the following the principles derived from observation of the effects of zero interaction followed by free interaction.

- a. When the sender faces a listener who has been exposed to a zero feedback situation, he encounters verbal hostility and abuse.
- b. When a zero interaction condition is followed by free feedback interaction, the sender encounters verbal hostility which will not decrease.
- c. Verbal hostility increases as the free feedback conditions continue because frustration is overcome when the listener is able to express it.
- d. Both a and c above

Question 10.

Which of the following describe(s) a relationship between leadership and communication.

- a. A leader is responsible for the effectiveness of downward communication and cannot shift responsibility to a subordinate for downward communication failure.
- b. A leader is responsible for improving the effectiveness and amount of his communication skill.
- c. A leader is responsible for building credibility in nonstress situations in order that credibility carries over into stress situations.
- d. All of the above

PROGRESS CHECK ITEM AND OBJECTIVE MATRIX

MARCH 1971

[illegible]

Question 33.

Select the correct definition of a visible audience condition.

- a. A communication condition in which the listener and the sender can see each other but the sender receives no feedback.
- b. A communication situation in which the sender is visible to his audience.
- c. A communication situation in which the sender can see his listeners and receives verbal feedback.
- d. A communication situation in which the listener and sender can see each other and the sender receives nonverbal feedback.

Ans. d, Ref. 4.1, T0-3/E0-2

Question 51.

Select the statement which BEST describes the effect feedback may have upon the behavior of the sender.

- a. Feedback allows the sender to modify his communication based on his knowledge of the outcome of his original communication.
- b. Feedback allows the sender to evaluate the feelings of the receiver and thereby enable him to improve his interpersonal relationships.
- c. Feedback allows the sender the opportunity to express his opinion on messages he receives.
- d. Feedback allows the sender the opportunity to evaluate all messages that are transmitted within the command.

Ans. a, Ref. 4.1, TO-1/E0-5

Question 6.

What is a distinguishing characteristic of interpersonal communication?

- a. An information transmission process intended to achieve a common understanding about some situation, object, or event
- b. The process of uttering by mouth or in words; spoken
- c. The process which permits the sender to modify his communication
- d. The elimination of most, if not all, barriers to communication

Answer: a

Ref.

CO

I-A.1, A.2; II-A.2.

Question 3.

A large corporation has just set forth new rules and regulations in its main plant, and the company executives are receiving feedback of mixed reactions from the plant workers.

How can the company executives encourage feedback from their workers while ensuring acceptance of the new procedures?

- a. Communication from top to bottom and vice versa is always a problem in a multilevel organization. With effective leadership and sufficient time, the situation will correct itself.
- b. Top management should arrange a meeting with all workers to explain the rationale for the new rules and regulations and request the workers' cooperation.
- c. Notices should be posted explaining the changes and the necessity for them, and requesting worker suggestions, via the suggestion boxes or discussions with supervisors for effective implementation and continued operation.
- d. All of the above

Answer: c Ref. CO I-A.1., B.1., C.1.; III-C.1.

CUMULATIVE POST-TEST

FOUR

Question 1.

The process by which a sender receives information of the effect of his message on the receiver is known as:

- a. Audience interaction
- b. Receiver reaction
- c. Interpersonal communication
- d. Feedback

Answer: d

Ref.

CO

I-A.2.a.

Question 12.

Which matching of words and statements is correct?

- | | |
|---------------------|--|
| 1. Audio-visual | A. Moderate interaction |
| 2. Oral | B. Anything spoken or
in writing |
| 3. Visible audience | C. Message reception |
| 4. Verbal | D. Uttered by mouth or
in words; spoken |

- a. 1-B, 2-A, 3-C, 4-D
- b. 1-A, 2-D, 3-C, 4-B
- c. 1-C, 2-D, 3-A, 4-B
- d. 1-B, 2-D, 3-A, 4-C

Answer: c

Ref.

CO

I-A.2, B.1; II-A.2; III-A.2,C.2,3.

Question 18.

What is a good example of a free feedback condition?

- a. A professor's lecture on physical chemistry followed by a ten-minute question/answer session
- b. A group discussion on the sociopolitical effects of television
- c. A group listening to an audio tape on communication, with the tape stopped frequently so that the students may answer questions
- d. A group studying a programmed text on learning processes, followed by a group critique of the method of presentation

Answer: b

Ref.

CO

I-B.1.

Question 27.

Which of the following will likely occur as a result of a change from free feedback interaction to visible audience interaction?

- a. Receiver frustration will increase over the former level.
- b. The accuracy of communication will decrease slightly.
- c. The time required to complete the communication will decrease somewhat.
- d. All of the above

Answer: d

Ref.

CO

I-B.1.

Question 30.

What is a good example of the level of interaction described as the "visible audience" condition?

- a. Professor Smith lectured to a group of students for 50 minutes, without a single comment from the class, describing and diagraming the composition of an igneous rock.
- b. Professor Cartwright was lecturing to a group of college students on the effects of drugs, but was unable to complete the lecture because of all the questions asked by the students during the lecture.
- c. Professor Brown asked the students if any one of them could explain the trigonometric identities about to be proved before going into detail on them in his lecture. Two students volunteered.
- d. All of the above

Answer: a

Ref.

CO

I-B.1.

Question 5.

Which kind of communication should be LEAST susceptible to the effects of psychological barriers?

- a. Oral, free feedback
- b. Non-verbal, visible audience
- c. Written, zero interaction
- d. Written, free feedback

Answer: a

Ref.

CO

I-B.1.c.

Question 15.

Match the examples of communication with the levels of interaction which they illustrate.

- | | |
|--|-------------------------------|
| 1. A written communication from the president of a hierarchical organization to all the vice presidents, with replies not requested or desired | A. Visible audience condition |
| 2. A professor's presentation to a large class on the psychological barriers in communication | B. Free feedback condition |
| 3. A verbal communication from a division officer to his petty officers, followed by an invitation to open discussion which the petty officers fail to take advantage of | C. Zero level feedback |
| 4. A discussion in economics class on the effects of a new tax bill | D. B and C |
-
- a. 1-D, 2-A, 3-C, 4-B
b. 1-A, 2-B, 3-D, 4-B
c. 1-B, 2-C, 3-B, 4-D
d. 1-C, 2-A, 3-D, 4-B

Answer: d

Ref.

CO

I-B.1; II-A.2.

Question 8.

Match the examples of communication to appropriate uses of feedback in overcoming communication barriers.

- | | |
|--|---|
| 1. A radio operator has difficulty in transmission because of the excessive amount of static on the receiver. | A. Evaluation of performance permits assessment of effects of psychological barriers |
| 2. A memorandum is sent to department heads with an underlined and capitalized request for immediate reply. | B. Repetition of the message by the receiver is required to check reception |
| 3. A ship's flashing light signal cannot be seen by the harbormaster because of heavy fog. | C. Absence of reply to the message requires a change to another form of communication |
| 4. A petty officer explains the use of a piece of equipment, and requires each man to demonstrate its operation. | D. Message completion requires an attention-getting communication |
-
- a. 1-C, 2-B, 3-A, 4-D
b. 1-C, 2-B, 3-D, 4-A
c. 1-B, 2-D, 3-C, 4-A
d. 1-B, 2-C, 3-D, 4-A

Answer: c

Ref.

CO

I-B.1; III-C.1.

Question 26.

Professor Smith changes his lecture course to a seminar in order to establish free feedback interaction with his students.

Which of the following are the likely results of this change?

- a. Receiver frustration and the time to complete communication will decrease, while the accuracy of communication and confidence in that accuracy will increase.
- b. Time to complete the communication and its accuracy will increase, while receiver frustration and confidence in the accuracy of communication will decrease.
- c. Receiver frustration will decrease, but the accuracy of communication, confidence in that accuracy, and time to complete the communication will all increase.
- d. None of the above

Answer: c

Ref.

CO

I-B.2.

Question 29.

Match the communication problems and solutions.

- | | |
|--|--|
| 1. A lieutenant orders his men to do a job a certain way, and is startled to find later that they have been getting the job done differently all along. | A. One must remember that a conceptual barrier is caused because some words have different meanings for the sender and receiver. |
| 2. A southern executive recently entered a northern firm and tells his secretary to make arrangements to have someone carry him to the airport that afternoon. The secretary laughed at his request. | B. A leader must remember he is responsible for the effectiveness of downward communication, and must be aware of his subordinates' limitations. |
| 3. A business executive laid the blame on his office manager for not getting the work done in accordance with his verbal instructions. The office manager had misinterpreted the instructions. | C. A leader must remember that he has the responsibility for improving his communication skills. |
| | D. A leader must encourage and be sensitive to feedback. |
-
- a. 1-B, 2-A, 3-D
b. 1-A, 2-B, 3-D
c. 1-A, 2-D, 3-C
d. 1-B, 2-D, 3-C

Question 1.

Chief Small, senior quartermaster aboard a cruiser in port for overhaul, gives a lecture on buoyage systems to the men in his division. Because of his vast knowledge of the subject the Chief decides not to use any training aids. However, his accent sometimes creates problems for him in getting his point across. About midway in his lecture some yard workers arrive to make alterations to the space where the lecture is being held.

Which of the following statements best describes the reason for Chief Small's lecture being a poor oral message?

- a. Oral communication often requires visual support material for clarification.
- b. Oral delivery is often subject to interference due to noise.
- c. Oral communications are often subject to distractions due to pronunciation.
- d. All of the above

Question 2.

CAPT Land is the Commanding Officer of the USS Princeton. His ship was about to complete a nine-month deployment when orders were received to remain on station an additional two months. CAPT Land must decide what means of communication he should use to inform the crew of the change in the ship's schedule.

Which of the following means of communication should the Captain use to announce the change of schedule to the ship's crew, with the primary goal of minimizing the effects of the message on crew morale?

- a. CAPT Land should pass the word over the IMC.
 - b. CAPT Land should have the message put in the Plan of the Day.
 - c. CAPT Land should have the Executive Officer pass the word at morning quarters.
 - d. CAPT Land should assemble the crew and give them the message orally.
-

Question 3.

Select the correct DEFINITION of oral communication.

- a. Uttered by mouth or in words; spoken
- b. Verbal transmission of a message from one individual to another
- c. Verbal transmission of a message
- d. All of the above

Question 4.

The most accurate comparison of the advantages and disadvantages of written communication would be:

- a. Although written communication is subject to rapid distortion, its primary advantage is that it can be filed as a permanent record.
- b. Although written communication reduces distortion and can be referred to later, immediate clarification is not readily available.
- c. Although written communication enhances retention, can be filed to become a permanent record, and allows for immediate feedback, it requires extensive preparation time.
- d. Although written communication is subject to rapid distortion, its primary advantage is immediate clarification.

Question 5.

LT Smyth is the Personnel Officer for an aircraft squadron of three hundred men. Knowing that these men are personally concerned with the Sea-Shore rotation plan used by the Navy, he has decided to give an oral lecture on SEAVEY-SHORVEY procedures to all the division officers within the squadron. The purpose of the lecture is to give to the division officers the knowledge they need to discuss the timing, requirements and procedures of the rotation plan intelligently with their men. A few weeks after the lecture, however, LT Smyth still finds that the men in his squadron have as many--possibly more--questions about SEAVEY-SHORVEY patterns.

Which statement best illustrates the disadvantages of oral communication, as described in the above example?

- a. Oral communication used with complex information is not conducive to long term retention by the receiver.
- b. Oral communication is subject to rapid distortion in the memory.
- c. Oral communication often requires visual support material for clarification.
- d. All of the above

Question 4.

The Annual Navy Relief Drive began about two weeks ago. ENS Bond recently overheard his men discussing the subject and was not entirely sure they would contribute. At his next divisional meeting he asked the Chaplain to explain the administration of the Navy Relief Program. ENS Bond also showed his men a chart depicting the ways in which contribution monies are used, and one that listed several projects of the Navy Relief Organization. After this information was presented, ENS Bond dramatically cited examples of men previously in his division who had received aid from Navy Relief at times when they were experiencing severe financial difficulties, and he vividly described how any one of his men might some day request assistance from Navy Relief.

Which of the following statements best illustrates the nonverbal communication shown in the above example?

- a. ENS Bond's gestures, tone of voice, and facial expressions, emphasizing the important aspects of the Navy Relief Program and its direct connection with the men
- b. ENS Bond's use of the charts, which gave the men a better understanding of the Navy Relief Organization
- c. The effect of having a knowledgeable person (the Chaplain) explain the administration of the program
- d. ENS Bond's citing examples of his men previously obtaining assistance from the Navy Relief Organization

WESTINGHOUSE LEARNING CORPORATION

Annapolis, Maryland

1971

THE COMMUNICATION PROCESS (RECEIVER AND BARRIERS)

PROGRESS CHECK

Question 1.

A junior officer is in charge of a detail of men from the ship. They are to march in the Armed Forces Day Parade in the city in which the ship is visiting for the occasion. The officer outlines the events of the day for the men as follows: "I know you men are no more happy with this assignment than I am, but it will all be worth it as we are to be the guests of the city at dinner tomorrow evening after the parade. We will leave the ship at 0800 in the morning and be transported by bus to the assembly point. The same bus and driver will pick us up at the ship at 1800 tomorrow to transport us to dinner. When the parade is over we will wait at the dispersal area for transportation back to the ship. You are free to go from the parade on liberty if you so desire."

Which of the following statements best describes the probable cause of a communication failure between this officer and the men in the above situation?

- a. The structure component of the message was inadequate.
- b. The officer created confusion when he elaborated to the men that he didn't like the assignment any more than they did.
- c. The sequence component of the message was poorly planned and presented by the officer.
- d. The officer ignored the feedback he was getting from the men, as he should have known that they volunteered for the detail rather than having been assigned to it.

Question 2.

Which of the following statements correctly describes all of the aspects of the communication process?

- a. A person to whom the message is directed, a person who transmits the message, and the process which permits the sender to modify his communication based upon his knowledge of the outcome of his original communication
- b. A person to transmit a message, a person to receive the message, and feedback from the person to whom the message is directed
- c. A person to whom a message is transmitted, something which causes a blockage or distortion of the message, and the feedback which permits the sender to modify his communication
- d. A person who transmits a message, a person to whom the message is directed, anything that causes blockage or distortion of the message, and that which allows the sender to modify his communication, based upon his knowledge of the outcome of his original communication

Question 3.

During English class, a MIDN was looking out the window at the snow. Being a skiing enthusiast, he began planning his weekend in the mountains. At the end of the class period the professor gave the students a quiz on the material he had just covered in class, and the young skiing enthusiast failed the quiz.

Which of the following statements correctly states the reason for the above communication failure?

- a. The professor failed to utilize feedback from the inattentive student.
- b. A communication barrier existed between the student and the professor due to the distraction of the snow.
- c. The student's psychological attention was not attuned to the instruction of the professor, preventing detection of the message.
- d. The student's memory was preoccupied by skiing, preventing decoding of the message.

Question 4.

Which of the following statements best describes the factors affecting the decoding of a message?

- a. The receiver uses his memory to establish word meaning, which must equal the sender's meaning and which must be emphasized by the sender's nonverbal communication.
- b. The meaning of the detected words must equal the sender's meaning, which must be accompanied by nonverbal symbols.
- c. In order to decode the message, the receiver must use his memory to establish word meaning, and interpret the meaning of the gestures and tone of voice used by the sender.
- d. The receiver's interpretation of the nonverbal communication of the sender, the ability of the receiver to use his memory to establish the word meanings, and the relation of the receiver's word meanings to those of the sender.

Question 5.

The Commanding Officer of a ship has just returned from a predeployment conference in the Force Commander's office. He informs the Executive Officer that two of the four ports which they were scheduled to visit upon completion of their operations on deployment have been cancelled, and that there isn't much hope of scheduling any new ports to visit due to the location of their deployment; he orders the word put out. At a department head meeting that afternoon the Executive Officer passes this message to them, and they in turn notify their division officers. The word on the cancellation of the ports of visit finally filters down to the men on board. One afternoon the Executive Officer while talking to one of the men in the Deck Division, is asked why the ship isn't going to visit any liberty ports upon completion of their deployed exercises.

What action should have been taken to prevent such a physical barrier from happening in the communication network?

- a. The information should never have been put out to all hands, but passed only to the officers.
- b. The information should have been published in the Plan of the Day or announced over the PA system, to eliminate the movement of the message through so many links.
- c. The Commanding Officer should not have passed the word to anyone other than his Executive Officer and the Navigator, as a serious morale problem could have been caused by the leak of such information.
- d. The Executive Officer should have required a questionnaire to be made up on the up-coming deployment to be filled out by all hands to ensure that everyone had the correct information on the deployment.

Question 6.

Which of the following statements is the correct definition of a physical communication barrier?

- a. Too great a distance between the sender and the receiver may require them to change their type of communication.
- b. Barriers within the environment that cause interference with the reception of the message by the sensory organs
- c. Barriers within the environment which prevent a message being transmitted from the sender to the receiver
- d. A physical communication barrier must be comprised of the following: physical distance, audio-visual interference conditions, size and complexity of the organization, and the amount of communication in the environment.

Question 7.

LCDR Smith, in charge of the Military Personnel Office at the Naval Submarine Base, Pearl Harbor, Hawaii, had revised the procedures for processing orders into six steps instead of three. He tried to call his assistant, LTJG Hanks, but found he was not at his desk. LCDR Smith decided to go get a cup of coffee. As he walked into the coffee mess he saw Mr. Hanks talking to his wife who had just returned from the doctor's office with the news that they are expecting their first child. LCDR Smith stopped and proceeded to explain the six steps in the procedure which he had just revised to Mr. Hanks. Mr. Hanks, of course, heard little, if anything, that LCDR Smith had to say.

Which of the following statements most correctly identifies the action which should have been taken by LCDR Smith to prevent the breakdown in communications?

- a. Mr. Hanks' wife should not have been on board during normal working hours, so LCDR Smith should have ordered him back to the office to discuss the six steps in the new procedure.
- b. Since the breakdown in communications was caused by a status problem, LCDR Smith should have used empathy and been concerned with Mr. Hanks' communication first.
- c. Since the breakdown was caused by message competition, LCDR Smith should have waited until Mr. Hanks returned to the office to explain the new procedures.
- d. None of the above

Question 8.

Which of the following statements best describes the disadvantages of excessive communications?

- a. It causes unnecessary delays of action if such is the intent of a message.
- b. It limits the lower levels in the communication network in obtaining clarification of the message from higher levels.
- c. With excessive communication in the environment a message will be distorted and diluted by the time it reaches its end.
- d. Excessive communications causes message competition, impairs the feedback process, and delays action.

Question 9.

The men in the division had spent the entire day holding "Field Day" aboard the ship in preparation for the Materiel Inspection which was to be held the following day, and they were physically exhausted. The ship was moored about a half a mile from the main gate of the base. One of the seamen in the division (who is from the south) lives just outside of the main gate, and at "Knock off ship's work," he asked several of the men in the division if they would "carry him home." "Carry me" in the south means the same as "Give me a lift." The men he asked looked at him as though he was some sort of a nut and just went on their way and prepared to leave the ship at "Liberty Call."

Why does a communication breakdown exist and what course of action could have been taken to prevent it?

- a. The words of the sender had a different meaning for the receivers because of the different parts of the country in which they were raised. The situation could have been prevented by one of the men asking the seaman exactly what he meant by "carry."
- b. Because of the different parts of the country in which the men involved were raised, the words meant one thing to the sender and another to the receiver. The young seaman should have realized his error in using the phrase "carry me" from the feedback he was getting, and should have asked one of the men for a lift home.
- c. Both of the above
- d. None of the above

Question 10.

Which of the following statements best describes the concept of a psychological barrier?

- a. Barriers that are present in the receiver and/or the sender that may require them to change their type of communication
- b. Barriers that are present in the receiver and which cause interference with the reception of the message by the sensory organs.
- c. Barriers that are present in the receiver and/or the sender which prevent reception of the message.
- d. None of the above

PART 4 SEGMENT III

T. O. Number	TEST ITEM
2	<p>LT Harris, an NROTC Instructor, was lecturing his class of midshipmen in "The Principles of Leadership." The lecture involved many technical terms from psychology, sociology, and management. However, LT Harris' presentation dealt mainly with principles rather than definitions, since he felt that the meaning of the terms was clear from the context. LT Harris continually walked back and forth in front of the classroom with his hand in his pocket, and spoke in a monotone voice. The midshipmen failed to grasp the principles of leadership being taught during this session of class. Which of the following statements correctly describes the communication failure which occurred through the decoding process?</p> <p>(a) LT Harris' lack of non-verbal communication caused the communication failure.</p> <p>(b) The students' past experience was inadequate to provide accurate meaning for many of the words in the lecture.</p> <p>(c) The structure component of the lecture was very poorly prepared causing the midshipmen's senses to be directed toward something or someone other than the Lieutenant.</p> <p>(d) Because of LT Harris' failure to set an example of leadership while lecturing on "The Principles of Leadership," he set up a communication barrier between himself and the midshipmen causing the communication failure.</p> <p>Answer: a</p>

Question 17.

A student whose college classes are grouped on a Monday-Wednesday-Friday schedule has an off-campus job. By Friday afternoon he is usually tired out and falls asleep during his history lecture. He misses so much that he fails the course.

In which communication process is his failure rooted?

- a. Decoding
- b. Detecting
- c. Audio/visual barrier
- d. Perceptual barrier

Answer: b

Ref.

CO

III-B.1.a., 1.b.

Question 20.

What is the difference, if any, between audio/visual barriers and physical distance in communication?

- a. Physical distance refers to actual distance between sender and receiver, and determines the mode of communication (oral or written), while audio/visual barriers refer to noise and light which interfere with reception regardless of distance.
- b. Audio/visual barriers include anything that interferes with the hearing or sight of the receiver; thus, physical distance constitutes a type of audio/visual barrier.
- c. Physical distance is an environmental factor while audio/visual barriers have to do with detecting/decoding processes in the receiver.
- d. There is no difference since they are both barriers within the environment that cause interference with the reception of the message by the sensory organs.

Answer: a

Ref.

III-C.1.

Question 14.

You see a friend across the street. You shout over to him that you'll meet him at the corner drugstore for coffee in a few minutes. However, he can't understand what you are saying because of the traffic noise.

What kind of a communication barrier is involved in this example?

- a. Environmental
- b. Perceptual
- c. Audio/visual
- d. Distance

Answer: c

Ref.

CO

III-C.1.a.1) through 2)a)

Question 9.

Environmental factors causing interference with reception of the message by the sensory organs are:

- a. Audio/visual barriers
- b. Environmental barriers
- c. Physical barriers
- d. Perceptual barriers

Answer: c

Ref.

CO

III-C.1.

Question 25.

Which of the following examples of communications in hierarchical structures is most likely to be subject to distortion and dilution?

- a. The Deck Division Officer directs a messenger to hand-carry emergency requisitions through the ship's Supply Office for approval, and then directly to the depot ashore.
- b. The Captain explains the up-coming liberty procedures to the crew over the ILC.
- c. The division officer explains a new inspection policy to the division petty officers and tells them to be sure that the word is passed to all men of the division.
- d. A major change to an important personnel regulation is received. Though there are not sufficient copies to post throughout the ship, each division officer receives a copy to read and explain to his men.

Answer: c

Question 10.

RADM Jones sends a written communication to his German NATO counterpart.

Which of the following communication barriers is most likely to cause a breakdown in communications?

- a. Conceptual
- b. Cultural
- c. Organizational
- d. Perceptual

Answer: b

Ref.

CO

III-C.1, C.2.

Question 28.

What is the correct definition of conceptual barriers?

- a. Barriers present in the receiver and/or sender which distort the meaning of the message
- b. Barriers that arise primarily from differences in semantic frames of reference
- c. Barriers which arise from differences in the sender's and receiver's previous experience
- d. Barriers which arise from the environment of the sender and the receiver

THE COMMUNICATION PROCESS (SENDER AND FEEDBACK)

PROGRESS CHECK

Question 1.

Marine CAPT Rollins assembled his four platoon leaders to explain the next mission. Their company, which had not been in combat for over a month, was to engage in a search-and-destroy mission in conjunction with three other companies--each performing a different function. The objective was to encircle an enemy battalion in a deserted village in Vinh Loc District. CAPT Rollins' unit and another company were to lead the attack, with the other two companies acting as blocking forces. The mission was dangerous and timing was of extreme importance.

(Continued)

Question 1. (Continued)

Which of these is the best delivery technique for communicating the assignment to the platoon leaders?

- a. CAPT Rollins should begin by emphasizing that the platoon leaders had not been in combat for a long time, and had better listen attentively. He should then proceed to inform them of the battalion's objectives and the roles of the other individual companies. After explaining their own roles he should remind them that they are expected to perform well.
- b. CAPT Rollins should begin his explanation by stating that on the basis of the company's excellent performance record in the past, they have been again selected to lead the attack in the upcoming operation. He should then explain the overall mission and fully explore the company's role in relation to the other companies. During the discourse, CAPT Rollins should periodically ask key questions about the timing of the operation and the planned manner of execution. He should further encourage the platoon leaders to ask questions or make suggestions so that the assignment is completely understood by everyone.
- c. CAPT Rollins should give his platoon leaders a formal briefing on the mission. He should reestablish his own position as leader and final decision maker. The platoon leaders should be made to repeat everything they have heard so that CAPT Rollins is certain that no misunderstandings exist.
- d. CAPT Rollins should initially emphasize the danger in the new mission and remind the platoon leaders that sloppiness in timing will not be tolerated. He should allow the platoon leaders opportunity to ask key questions or make suggestions so that the assignment is completely understood by everyone.

Question 2.

Select the statement which correctly defines encoding.

- a. Encoding is to receive a sender's thoughts and then convert them into meaningful sentences.
- b. Encoding is a means of disguising thoughts so that disinterested parties cannot understand them.
- c. Encoding refers to the conversion of the sender's thoughts into oral, written, and nonverbal symbols.
- d. Encoding is the selection of those words and symbols which are inappropriate to understandable communications.

Question 3.

LTJG Thomas ordered his men to "hasten to the assistance of all the hapless gentlemen of the aircraft cubicles who by an unfortunate stroke of fate find themselves surrounded by the lapping frowns of salted water."

Select the reason why LTJG Thomas' men did not understand this order.

- a. LTJG Thomas did not utilize enough nonverbal symbols in his communication.
- b. LTJG Thomas misused his men's frame of reference.
- c. LTJG Thomas failed to consider the men's moment-to-moment variations in mood.
- d. LTJG Thomas did not use appropriate language in communicating his order.

Question 4.

LTJG Webster, an officer whose heavy drinking often resulted in substandard appearance, lectured his men on the necessity of maintaining military discipline, behavior, and appearance while on liberty in a foreign port.

Select the statement which describes the best way to deliver the message while maintaining credibility.

- a. LTJG Webster should have had another officer deliver the lecture.
- b. LTJG Webster should have issued a written directive for personal distribution to each man.
- c. There is no best way for LTJG Webster to give such a lecture to his men without loss of credibility until such time as his conduct and performance of duty are exemplary in all aspects.
- d. LTJG Webster should have apologized first for his sloppy appearance and then delivered the lecture to his men.

Question 5.

LTJG Clay called all his CPOs together for a briefing. The men were all experienced repair supervisors who had attended the most advanced Navy schools in their specialty. LTJG Clay explained their new responsibilities in simplistic terms, as if they might not understand the technical language generally used in such briefings.

Select the statement which is the best alternative way LTJG Clay could state his message and avoid a negative impression.

- a. LTJG Clay should issue a written memorandum.
- b. LTJG Clay should use language appropriate to his CPOs' level of understanding to avoid talking down to them.
- c. LTJG Clay could improve his own competence in the repair area.
- d. LTJG Clay should provide extra instruction for his men before briefing them on new material.

Question 6.

Select the statement which best describes the reason for asking key questions.

- a. Key questions should be asked because verbal communication is one of the least effective forms of communicating.
- b. Key questions should be asked because it must be assured that a message sent has long range applicability.
- c. Key questions should be asked because it is possible that the receiver and sender may give entirely different meanings to the same message.
- d. Key questions should be asked so that the least intelligent receiver is made to understand the message.

Question 7.

Select the statement which describes the correct reasons for modifying a message.

- a. Senders tend to evaluate, judge, and approve or disapprove of other people's statements.
- b. Enlisted men tend to listen only to communication that is geared to their interests and needs.
- c. Most senders talk down to their receivers without realizing it.
- d. Receivers tend to evaluate, judge, and approve or disapprove of other people's statements.

Question 8.

Select the example(s) in which the officer has applied the rule of obtaining attention.

- a. "LCPL Jones, you are the best shooter in the company. When we go to the rifle range tomorrow, I want you to prove that to the others."
- b. "Mister Fletcher, ENS Topp is smart, competent and aggressive. Why haven't you completed the job I gave you yesterday?"
- c. "ENS Topp, see to it that all your incompetent misfits are given extra instruction on naval customs and traditions."
- d. Both a and b above.

Question 9.

CAPT Reynolds, a Marine reconnaissance pilot, was informed by his commander that an increase in the aerial reconnaissance coverage of the infantry's area of operation was necessary. He called a briefing of all his pilots.

Select the example of message delivery and feedback which will best assure CAPT Reynolds that the pilots understand his orders.

- a. CAPT Reynolds should present the information orally followed by a question and answer discussion period.
- b. CAPT Reynolds should ask the pilots to individually come into his office after the briefing to state their questions or objections.
- c. CAPT Reynolds should provide each pilot with a written proposal of the changes to be made, and ask them to submit their written comments as soon as possible.
- d. None of the above

Question 10.

LTJG Decker of the Air Department called all the repair supervisors into the briefing room. He told them that the present time allotted for the repair of certain engines would be decreased by one half. The supervisors looked at each other in dismay. PO Masters asked LTJG Decker if they were to receive additional personnel. Decker replied with a curt "Negative."

Select the statement(s) which correctly describe(s) the mode of feedback the leader received.

- a. The mode of feedback was in the form of a verbal question.
- b. The mode of feedback was in the form of facial expressions of dismay.
- c. The mode of feedback was in the form of initial silence or lack of feedback.
- d. Both a and b above

Question 31.

Which of the following is not considered a technique in actual message delivery?

- a. Organize the message
- b. Avoid offending the receiver and talking down generally
- c. Establish credibility
- d. Ask key questions

Answer: a Ref. , CO IV-A.2; VII-A.3.

Question 9.

Which matching of the following situations and terms is correct?

- | | |
|--|---|
| 1. The CO used the public address system. | A. Downward communication utilized |
| 2. ENS Smith empathized with his men and maintained an effective open-door policy. | B. Upward communication enhanced |
| 3. LT Smith paused frequently as he delivered his message. | C. Promoted feedback |
| 4. The division officers failed to announce the holiday leave policy. | D. Prompted rumors |
| | E. Demonstrated good encoding technique |
-
- a. 1-E, 2-C, 3-B, 4-E
b. 1-B, 2-A, 3-E, 4-D
c. 1-A, 2-B, 3-C, 4-D
d. 1-D, 2-E, 3-D, 4-C

Answer: c Ref. CO IV-A.3., B.4; V-A.2; VI-A.2.

Question 18.

What communication system, channel, or technique is BEST defined by the explanation that it arises from the social interactions of people within the organization?

- a. The grapevine
- b. The formal communication system
- c. Feedback
- d. The informal communication system

Answer: d

Ref.

CO

IV-B.3

Question 38.

Which of the following could least be described as a form of feedback?

- a. The Supply Officer tells all personnel requesting boots that supplies are near exhaustion..
- b. The Commanding Officer issues his instructions in the Five-Paragraph Order form.
- c. ENS Davis shuffles papers expectantly while waiting for his men to take advantage of his successful open-door policy.
- d. ENS Franlin tells ENS Goldberg that he has been told by ENS Smith about the Captain's party planned for the entire crew at the next in-port period.

Answer: b

Ref.

CO

IV-B.3; V-A.2; VI-A.1; VII-A.3.

Question 28.

Which matching of the following words and statements is most correct?

- | | |
|-------------------------|--|
| 1. Feedback | A. Result of weak, formal system |
| 2. Upward communication | B. Used for reports |
| 3. Rumor | C. Often blocks communication |
| 4. Panic | D. Facilitates two way communication |
| | E. Threat to general well being; no appropriate response readily available |

- a. 1-B, 2-A, 3-C, 4-E
- b. 1-B, 2-D, 3-A, 4-C
- c. 1-D, 2-B, 3-A, 4-C
- d. 1-D, 2-B, 3-C, 4-E

Answer: c Ref. CO IV-B.3; V-A.2; VI-A.2.; VII-A.2.

Question 5.

Which matching of the following concepts and descriptions is most correct?

- | | |
|--------------------------|-----------------------------------|
| 1. Open-door policy | A. USMC Communication Procedure |
| 2. Five-Paragraph order | B. A type of formal communication |
| 3. Grapevine | C. Orders down; reports up |
| 4. Communication network | D. A good means for feedback |
-
- a. 1-C, 2-B, 3-A, 4-D
b. 1-D, 2-A, 3-C, 4-B
c. 1-D, 2-A, 3-B, 4-C
d. 1-B, 2-A, 3-D, 4-C

Answer: d Ref. CO IV-B.4; V-A.1; VII-A.3.

FORMAL COMMUNICATION AND ITS DIMENSIONS

PROGRESS CHECK

Question 1.

Which of the following examples illustrates upward, downward and lateral official communication within the chain of command?

- a. The Recreation Committee aboard a submarine held a meeting and after much discussion among themselves they agreed to submit a request that a given amount of money be allotted for a ship's party. The request was submitted to the Commanding Officer via the Recreation Council and the Executive Officer. After a day or two had passed, the letter was returned to the Recreation Committee with an approving endorsement by the Commanding Officer.
- b. At a critique of an Administrative Inspection, the Squadron Engineering Officer elaborated on the discrepancies of the Engineering Department of the ship that was just inspected. The ship's Engineering Officer and his leading chief in the department both commented on these discrepancies and thanked the Squadron Engineering Officer for his efforts during his thorough inspection.
- c. During a meeting of the department heads aboard a cruiser, the upcoming shipyard overhaul was discussed at great length. The department heads decided that it would be beneficial to establish a definite leave policy while the ship was undergoing overhaul, and they submitted their recommendation to the Commanding Officer via the Executive Officer.
- d. All of the above

Question 2.

After attending the latest fleet deployment scheduling conference, the CRUDESPAC operations officer published a schedule of ships which were to participate in the Coral Sea celebration in Australia. The Captain of one of the designated destroyers amplified this information in a meeting with his division officers and directed that they disseminate the information and post the schedule for the celebration on the bulletin boards.

Did the Captain of the destroyer accomplish the objectives of downward communication?

- a. The Captain accomplished only one of the objectives of downward communication: He controlled the flow of information.
- b. The Captain accomplished both objectives of downward communication: He controlled the flow of information and he sent information from the senior to subordinate levels.
- c. The Captain accomplished only one of the objectives of downward communication: He sent information from the senior to subordinate levels.
- d. The Captain accomplished none of the objectives of downward communication because he relayed the information verbally only to the division officers.

Question 3.

Which of the following statements is a correct definition of upward communication?

- a. The formal type of communication which gives the leader a channel in which he can immediately and directly send subordinates information
 - b. A type of communication used by subordinates to convey suggestions, reports, and grievances to superiors
 - c. The transmitting of messages from subordinate levels to other subordinate levels of the organization
 - d. Both b and c above
-

Question 4.

Which of the following statement(s) describe(s) the general objectives of upward communication?

- a. To transmit information from subordinate level to senior level
- b. To allow enlisted men to contribute ideas and/or constructive criticism
- c. To allow a means for building a greater sense of participation by men in a division
- d. All of the above

Question 5.

A Battalion Officer at a meeting with his midshipmen company commanders directs them to coordinate the use of a picnic area during June Week. Each company is authorized to use the area for one 4-hour period. During the meeting of the midshipmen company commanders to work out the schedule, MIDN Sands does not pay attention to the discussion because he is thinking of his wedding which is to take place on graduation day. Later while briefing his company on the details of the plans, MIDN Sands finds himself unable to answer questions on the uniform, transportation, expenses, and guests.

What caused the communication breakdown between the midshipmen company commanders and MIDN Sands?

- a. He failed to listen carefully during the Battalion Officer's briefing.
- b. He failed to listen carefully during the coordination meeting with the midshipmen company commanders.
- c. He failed to train his subordinates to provide useful feedback.
- d. All of the above

Question 6.

Which of the following statements is a correct definition of lateral communication?

- a. The transmission of messages from one command to another command, such as from the destroyer acting as plane guard to the aircraft carrier
- b. The transmission of messages from the line elements of a command to the staff elements of a command
- c. The transmission of messages to persons at the same level within an organization or at the same level in different organizations
- d. Lateral communication is the only formal type of communication that by-passes the chain of command.

Question 7.

As a division officer aboard a submarine tender you notice that a couple of your men show a lack of interest in their work, and that each of them at different times has been late for quarters. You have also noticed that whenever the division participates as a division in anything (intramural sports, etc.) that these men do not participate. You ask your leading chief what, if any, problems these men have and he states that he knows of no problems the men may have. As a division officer, what steps should you take to find out what their problems are?

- a. Tell your leading chief to go directly to the men and find out what is troubling them, assist them with their problems, and get them back as participating members of the division.
- b. Let it be known at morning quarters that you are available at any time to any of your men who want to come in and talk to you about anything. Periodically walk through the division spaces and talk informally with your men.
- c. Call these men into your stateroom c. at a time and let them know that you want each and every man in your division to be a participating member of the division and that you will not tolerate those who do not carry their share of the load.
- d. The best solution to the problem would be to get rid of the couple of men in your division who are having problems and seek out new and better replacements from other divisions aboard your ship.

Question 8.

Which of the following statements is the best description of "open-door" policy?

- a. The "open-door" policy is the leader's invitation to his subordinates to talk things over at any time at the convenience of the subordinate.
- b. The "open-door" policy is the leader's invitation to his subordinates to talk things over at any time at the convenience of the leader, so the leader may meet his daily deadlines.
- c. The "open-door" policy is another means to supplement and stimulate downward communication.
- d. The "open-door" policy increases good relations between subordinates and the leader by offering the latter an opportunity to initiate conversations with subordinates during informal visits.

Question 9.

Which of the following statements is a description of the advantages of formal communication?

- a. As a division officer, it gives you a channel through which you can immediately and directly transmit to your men information which is required for the operation of your division.
- b. As a commanding officer, it would provide a channel for your crew through which they could transmit suggestions and grievances to you.
- c. It gives a force commander the channel through which he can immediately and directly send commanding officers of his units information required for the operation of their ships and the force.
- d. All of the above

Question 10.

Which of the following statements best describes the disadvantages of formal communication?

- a. Aboard a ship the formal communication network is used strictly for communications between the ship and other units at sea, the Squadron Commander, Flotilla Commander and the Force Commander.
- b. Aboard ship the formal communication network is primarily used to transmit orders downward and reports upward, which tends to stifle the use of the network for other purposes.
- c. The formal communication network in the Navy permits lateral and downward communication and does not allow for upward communication.
- d. Personnel in the Navy are much more apt to use the formal communication network for lateral communication than for upward or downward communication.

Question 72.

Which of the following statements BEST describes the importance of upward communication?

- a. Upward communication is important because it not only allows subordinates to question orders but also allows leaders to determine if the needs of their subordinates are being satisfied.
- b. Upward communication is important because it allows subordinates to provide useful feedback; it is the most frequently used formal type of communication.
- c. Upward communication is important because it not only allows the leader to determine if his messages are being received and acted upon as he intended but also allows the subordinates to provide useful feedback.
- d. Upward communication is important because it allows feedback to reach the higher echelons of command thereby providing occasion for modification of original communications.

Ans. c, Ref. 4.5, T0-3/E0-3

Question 32.

ENS James maintains an open-door policy. However, when AN Hull appears at his door, ENS James is busily preparing a message which must be signed by the Captain within half an hour.

How should ENS James handle this situation?

- a. Schedule another visit for AN Hull, solely at the convenience of ENS James
- b. Explain to AN Hull why he can't stop to talk and schedule another visit for AN Hull, at AN Hull's convenience
- c. Momentarily stop his work and then encourage AN Hull to be as brief as possible
- d. None of the above

Answer: b

Ref.

CO

V-A.2.

Question 40.

The development of good listening habits is most important to which of the following concepts?

- a. Feedback
- b. Encoding
- c. Open-door policy
- d. Communication during stress

Answer: c Ref. CO V-A.2.; IV-A.1.,2.; VII-A.3.

Question 29.

ENS James makes several informal visits to his division's work areas weekly.

This action should most assist in supporting the use of:

- a. The upward communication network
- b. The Five-Paragraph Order
- c. The open-door policy
- d. All of the above

Answer: c

Ref.

CO

V-A.2; VII-A.3.

Question 27.

SN Smith overheard that liberty will commence at 1300 tomorrow. He informs SN Jones of this information.

This is an example of what type of communication?

- a. Informal, vertical
- b. Formal, vertical
- c. Formal, lateral
- d. Grapevine, lateral

Answer: d

Question 19.

CPO Abare is sent to another division to inform them that the department head will speak to all hands at 1500. He relays this message to CPO Jones.

This is an example of what type of communication?

- a. Formal, upward
- b. Formal, lateral
- c. Informal, lateral
- d. Informal, downward

Answer: b

Ref.

CO .

V-A.2; VI-A.2.

Question 10.

The officers assigned to CAPT Brown have very little social interaction. This situation will most likely inhibit establishment of a strong network for what kind of communication?

- a. Downward
- b. Upward
- c. Grapevine
- d. Lateral

Answer: c

Ref.

CO

V-A.2; VI-A.1.

Question 7.

At times, CAPT Brown unintentionally gives the impression that he is looking down on the personnel assigned to his staff. This attitude and his seeming hostility toward the enlisted men often has them confused as to which course of action to take.

This situation will probably affect which communication network with the greatest impact?

- a. Downward
- b. Upward
- c. Lateral
- c. Informal grapevine and open-door policy

Answer: b

Ref.

CO

V-A.2; VI-A.1.

Question 3.

The Operations and Training Officer has observed a need for more truck mechanics and has been delegated the responsibility for setting up a school for training automotive mechanics. This task requires considerable coordination efforts--consulting the Personnel Officer about the availability of men and discussing equipment needs with the Supply Officer.

What is the most effective means of communication for the Training Officer to use?

- a. Formal, downward communication
- b. Informal, upward communication
- c. Formal, lateral communication
- d. Informal, grapevine communication

Answer: c

INFORMAL COMMUNICATION

PROGRESS CHECK

Question 1.

A ship has been at sea for three weeks simulating wartime conditions in enemy waters. The crew is fatigued and grumbling. The ship is scheduled to leave the operating area early Thursday morning and transit back to port arriving late Friday afternoon (around 1700). During transit to port, the ship holds ISE (Independent Ship's Exercises) all day Thursday, and most of Friday. Friday morning a notice appears in the Plan of the Day which states that there will be a personnel inspection for all hands at 0900 Saturday morning. After making port, and the evening meal, several of the men are busy in the berthing compartments getting ready for the Saturday inspection. One man asks another if he is going on liberty after inspection. The second man replies, "How can anyone go on liberty. We've spent three weeks holding exercises and I've got a heck of a lot of work to get done. I think the skipper is nuts! The least he could have done is let us get some of our departmental work done en route to port instead of holding those stupid exercises."

Choose from the statements below the one which best describes the probable outcome of the informal communication above.

- a. This irresponsible comment will soon be communicated upwards. When it is, the man will undoubtedly be placed on report.
- b. Such informal communication merely provides an emotional safety valve, as the man expressed his emotions without the fear of any repercussions.
- c. Such distorted information will start a rumor and soon many of the crew will believe that the Captain is mentally unstable.
- d. All of the above

Question 2.

Which of the following statements is an example of informal communication?

- a. A written message of thanks is received by the Captain from the Chamber of Commerce of the city of Tampa, Florida, thanking him for having participated in their celebration of Armed Forces Day.
- b. One ensign mentions to another in the wardroom that the ship will be visiting New Orleans during the Mardi Gras, and that the officers will attend the formal inauguration ball.
- c. The leading petty officer of a department informs a seaman that he will have to remain after liberty call and help with the repair of some equipment.
- d. None of the above

Question 3.

Which of the following statements most correctly defines the term "grapevine"?

- a. An unstable channel of communication within an organization over which reliable information of high interest to the sender and receiver is transmitted.
- b. A fairly stable informal channel of communications within an organization over which rumors, or other informal and unofficial communications of high interest to the sender and the receiver, are transmitted.
- c. A channel of communication whereby people can identify with a group, and pass information of high interest to each other.

Question 4.

The Commanding Officer of a ship feels that he can enhance the morale of his men by having weekly leadership meetings with the leading petty officers from each department. The only time available to hold the meetings is on Saturday mornings, or some evenings after normal working hours. He would like to know how the petty officers feel about such a program, and what ideas they might have which would assist him in setting it up.

Which of the following paragraphs most correctly specifies the way in which the Commanding Officer should use the informal communication network to accomplish his objectives?

- a. The Commanding Officer should forward a memo to his department heads asking their comments and recommendations on the new program, allowing the grapevine to carry this information to the petty officers. There will be no problem in the Captain getting feedback on his proposal, as the leading petty officers within each department will be quick to act once hearing the word.
- b. The Commanding Officer should ask a couple of the leading departmental petty officers what they think of his proposal, and ask them to sound out the others. Once the word has been passed along the grapevine, the Commanding Officer can judge from the feedback whether or not he should implement such a program.
- c. The Commanding Officer should call an informal meeting of the petty officers to present the idea, to avoid distortion by the grapevine. He then can utilize feedback along the grapevine to identify the poor leaders who are interfering with the morale of the crew.
- d. None of the above

Question 5.

An order has been put out aboard a ship requiring all men to maintain a full sea bag aboard at all times. One Division Officer notices, however, that his men are slow in complying with the order. He overhears one of his men telling another that there just isn't enough room on board to store his clothing. Furthermore, he says he doesn't care what the Captain wants, and he just won't comply with nonsensical orders.

Which one of the following paragraphs describes the best way in which the Division Officer should utilize the informal communication network to get compliance with the order?

- a. Since the grapevine has a tendency to destroy information and people like to flout authority in front of their peers, the Division Officer should just ignore what he has overheard. He knows full well that the man has every intent of complying with the order, but doesn't want his shipmates to know this.
- b. The Division Officer should casually pass the word about this problem upward along the grapevine, so that the Commanding Officer will get feedback. Thus the ridiculous order will be rescinded or modified.
- c. Having utilized the grapevine to learn of the situation, the Division Officer should go to his reliable source in the division and have them put out the word which the Captain passed in the wardroom, that the Commanding Officer is going to require that each department hold a bag inspection in about a week. Since each man knows that he will have to account for all of his clothing at that time, the situation should soon be corrected.

Question 6.

A destroyer has been deployed and on station for four months. The men anticipated remaining on station for only three months when they deployed. The men are getting restless and irritable. None of them can think of a logical reason for the ship remaining on station after the normal three months.

Which of the following statements best describes the method that should be used to prevent the formation and spreading of rumors?

- a. The Commanding Officer should ensure that his men are informed as to why the ship is remaining on station beyond the normal three month period.
- b. The officers should circulate among the men to spot the grumblers and rumormongers, and any found should be called in for a dressing down.
- c. Operations of ships are always subject to change, and this is something that the men will have to get used to. The men should be regularly informed of this fact.
- d. On the occurrence of a rumor, the public address system should be used to acknowledge its existence, and deny its validity.

Question 7.

Which of the following is a correct definition of rumor?

- a. Unverified communication which may be acted upon whether highly accurate or totally inaccurate; rumors are usually spread by the busybodies in the organization.
 - b. Official communication circulated along the grapevine which may be acted upon; it supplements an organization's weak formal system.
 - c. Unverified communication from an unknown source passed along the grapevine; the information contained may be completely true, partly true, or totally false.
 - d. None of the above
-

Question 8.

Which of the following statements correctly identifies the principle governing the spread of rumors?

- a. Rumors spread in proportion to the ambiguity of the situation and the importance of the information carried on the grapevine.
- b. Rumors circulate along the grapevine at a rate independent of accuracy but are acted upon in proportion to their credibility.
- c. Rumors travel over a fairly stable informal channel within an organization, rapidly spreading unofficial communications of high interest to the sender and receiver alike.
- d. Rumors tend to spread laterally or downward at a rate proportional to their cause, and to a degree proportional to their credibility.

Question 9.

A ship is on weekly operations out of its home port and completes its scheduled exercises with local aircraft a day early. The Commanding Officer of the ship requests permission from the Flotilla Commander to remain on station to conduct ISE (Independent Ship's Exercises). The Flotilla Commander grants the ship's request and the ship commences its ISE. One of the radiomen tells some of the men at the noon meal that the reason the ship is remaining on station conducting ISE is not because they have to, but because the Captain wants to make points with the "Big Boys."

Which of the following statements best describes the steps the Commanding Officer should take to effectively combat the rumors which have started?

- a. Investigate to find out who started the rumor and have the guilty radioman under threat of mast punishment; pass the word that he was mistaken.
- b. Use the grapevine as a feedback mechanism for close monitoring of the crew's attitudes since the rumors carry a message for him.
- c. Acknowledge and bring the existing rumors out into the open by announcing over the public address system why he has requested that the ship remain on station to conduct ISE.
- d. The Captain should circulate informally and put out the word that the ISE was ordered by the Flotilla Commander.

Question 10.

LT Short is assigned to an inland ammunition depot for his first shore duty station. Located in a remote area, the depot employs a large number of local civilians. Upon arrival, the first thing LT Short hears from his small section is the rumor that the depot is going to be phased down to caretaker status in the next six months. This rumor is reinforced by the fact that a number of employees have been recently released from their jobs.

Which statement outlines the most appropriate steps LT Short should take to combat the rumor?

- a. He should energetically assume his new duties, acknowledging that he has heard the rumor but informing his subordinates that he knows the rumor is not true and that he will keep them informed of any new developments. To make the denial official, he should also publish a memo to that effect.
- b. He should insure that he initially establishes and continues to maintain high credibility as a leader. He should make a concerted effort to insure that his subordinates feel secure and should keep them informed, circulating informally to discuss what is going on within the organization. In addition, he should use the grapevine as a feedback mechanism for close monitoring of group attitudes.
- c. He should first circulate informally among his subordinates to determine the cause of the rumor and to identify the rumor-mongers. He should then discuss with them what is going on within the organization. Lastly, he should use the grapevine as a feedback mechanism for close monitoring of group attitudes.
- d. In order to establish and maintain high credibility as a leader, he should strongly deny the rumor over the public address system and make it clear that spreading unverified information will not be tolerated. He should then circulate informally to spot any trouble makers within the organization.

1	<p>A week prior to the deployment of a submarine on extended operations, some men bring aboard several cases which are taken to the communications center. The men are on and off the ship several times during that week, but no one knows why they are there or what they are doing. After the noon meal one day, one of the crew asked the radioman sitting at the table with him what was going on. The radioman said that he thought that they were installing some equipment, but what he wasn't sure, for he was not allowed in the area in which they were installing it. The radioman elaborated that it must be something important, as two specialists would be going on the deployment with them, and that even the chief radioman was not allowed in the area in which these men were working. What would be the most probable outcome of the above communication?</p> <p>(a) It will satisfy the needs of belonging and status for the man with whom the radioman talked since this need is not satisfied through the formal communication network.</p> <p>(b) The radioman is merely supplementing the downward communication of the formal communication network.</p> <p>(c) Such informal communication can start a rumor which may become totally distorted as it spreads.</p> <p>(d) The informal communication will act as a safety valve, since everyone is emotionally worked up over the secrecy.</p> <p>Answer: c</p>

Question 6.

"The state of a person in any situation where his general well-being is threatened, and where no readily available response exists to reduce the threat" defines:

- a. Stress
- b. Chronic fatigue
- c. Fear
- d. Panic

Answer: a

Ref.

CO

VI-A.1.

Question 16.

Rumor A: YNSN Smith, one of the Captain's yeomen, told SN Jones that the ship's deployment was to last two months longer than originally scheduled.

Rumor B: YNSN Smith, one of the Captain's yeomen, told PO2 Long that liberty would commence three hours early the following day.

Why did Rumor A most likely obtain a greater transmission speed than Rumor B?

- a. The grapevine network operates in a lateral dimension.
- b. Rumor A was of greater believability to the men than Rumor B.
- c. Rumor A was of greater interest to the men than Rumor B.
- d. All of the above

Answer: c

COMMUNICATION UNDER BATTLE SITUATIONS

PROGRESS CHECK

Question 1.

From the following choices, select the one that correctly identifies a situation in which panic is evident.

- a. During an attack on his ship, ENS Palmer deserted his post and tried to convince his shipmates to jump overboard.
- b. The Captain issues the order "Abandon ship" when he is sure that his ship has sustained irreparable damages.
- c. During his first combat experience ENS Wood became violently ill and nauseated, and considered deserting his post.
- d. During his first combat experience, ENS Bark noticed that he was trembling and that his leg was jerking uncontrollably.

Question 2.

During the night, the USS Patterson encountered a typhoon in the Gulf of Tonkin. ENS Long was awakened by the ship's violent pitching. The storm was making him very uneasy and he decided to go to the galley for a cup of coffee. When he entered the galley he found many crew members already there. As the conversation progressed, the tension dissipated noticeably, and the talk turned to the next Hong Kong visit.

Select the statement that identifies the manifestation of fear among the personnel described above.

- a. They were displaying negative fear characteristics.
- b. They were displaying no visible manifestations of fear.
- c. They were displaying positive fear characteristics.
- d. They were displaying intuitive fear characteristics.

Question 3.

The USS Snipe, which had been assigned picket duty off the coast of Korea, was constantly being tormented by nearby hostile patrol boats. After several weeks, ENS Bates noticed that efficiency in his Combat Information Center declined significantly. In addition, the men were easily angered over trivial matters and seemed unusually tired. Dissension among the crew was widespread and morale was low.

Select the statement that best describes the manifestations of fear illustrated above.

- a. The men were displaying negative fear characteristics.
- b. The men were displaying negative and positive fear characteristics.
- c. The men were displaying positive fear characteristics.
- d. The men were displaying exaggerated fear characteristics.

Question 4.

Select the statement that best defines stress.

- a. The state of a person in any situation where he demonstrates negative responses and an inadequate capability to cope with fear situations
- b. A behavior tendency that is demonstrated by deep states of depression and intense agitation
- c. The state of a person brought on by abnormally excessive activity
- d. The state of a person in any situation where his general well-being is threatened, and where no readily-available response exists to reduce the threat

Question 5.

SGT Richards, who was stationed in Vietnam, realized the dangers involved in convoy duty. Subsequently, each time Richards knew he was going to be given such an assignment, he reported himself ill at sick bay.

Select the statement that best describes the negative characteristics of fear portrayed in the above example.

- a. Richards was exhausted and used sick bay to avoid convoy duty.
- b. Richards was a victim of an uncontrollable fear that compelled him to report to sick bay.
- c. Richards was displaying avoidance behavior tendencies by reporting to sick bay.
- d. Richards was manifesting the symptoms of a mental disorder.

Question 6.

From the following choices, select the statement that is the best means of ensuring the understanding of orders.

- a. The leader conforms to the accepted methods of delivering orders and repeats the orders to ensure understanding.
 - b. The leader issues orders in a measured, crisp, authoritative manner and then asks the men if they know what to do.
 - c. The leader threatens men with the possibility of being put on report for misunderstanding orders.
 - d. All of the above
-

Question 7.

From the following choices, select the statement that identifies orders issued in a manner appropriate for a stress situation.

- a. The leader says: "Gentlemen, our mission is to clear this area for a field hospital. Read your orders and ask any questions you may have concerning the accomplishment of the mission."
- b. While on patrol, LT Bains observed incoming mortar fire approximately 25 yards away. He ordered his unit, "Move out, on the double, take cover in the ravine."
- c. During a night map exercise, LT Moore stopped to give orders. He said, "We proceed up this hill and then take a road three miles that bears to the left."
- d. All of the above

Question 8.

After two days as the forward observer for G Company, 1-LT Parks began to experience the loneliness of his new and dangerous assignment. He then started thinking about his own unit. He wanted to rejoin them as soon as possible.

From the following choices, select the statement that best describes the positive characteristic of fear portrayed above.

- a. LT Parks is strongly motivated to seek the company of others, and realizes how important his own unit is to him. He is more likely to carry out his mission successfully on account of this.
- b. LT Park's loneliness is not being dispelled, and his fear is mounting.
- c. Due to his dangerous assignment, LT Parks is developing fatigue and its accompanying symptoms.
- d. His situation is temporarily hopeless and relief is not readily available.

Question 9.

1-LT Locke was assigned to assault and secure Hill 283. LT Locke called his Platoon Leaders together to brief them. The general plan was explained, but by some oversight the 2nd Platoon was given incorrect movement information. The result was a reduction in firepower which created confusion in the assault phase of the mission.

Select the statement that describes the best alternative presentation by LT Locke to the 2nd Platoon that would have ensured effective communication of the necessary information.

- a. LT Locke should have repeated verbatim the information contained in the orders.
- b. LT Locke should have followed a standard format in briefing the Platoon, and should have asked for feedback during the briefing.
- c. LT Locke should have briefed his men about unexpected movements of personnel during combat conditions.
- d. LT Locke should have given alternate orders on the battlefield, and should have requested support from the rear areas.

Question 10.

Select the statements that describe the steps to take during battle conditions to make communications more effective.

- 1) The leader should use a standard format for preparing and issuing his order.
 - 2) The leader should issue verbal orders in a measured, crisp, authoritative manner, and should require feedback from individuals so that understanding is assured.
 - 3) The leader should ensure that each person under stress understands the "big picture," so that decisions to shift personnel from one place to another will not be unexpected.
 - 4) The leader should make sure that everyone concerned with the mission is present at the briefing, to ensure complete distribution of orders.
-
- a. 1, 2, and 4
 - b. 1, 3, and 4
 - c. 1, 2, 3, and 4
 - d. 1, 2, and 3
